

Sales Conversion Analysis Report

JULY 2023

PART 1: COMPANY-WIDE PERFORMANCE

A comprehensive diagnostic analysis of lead conversion performance across Emerald Properties Ltd, examining sales executive effectiveness, gender patterns, property types, and inspection impact.

Executive Summary: Conversion Performance

43.5%

Overall Conversion Rate

193 total leads generated in July 2023

84

Successful Sales

Strong monthly performance

61.3%

Inspection Impact

Inspections drive conversions

Key Findings

Our July analysis reveals critical patterns in conversion performance. Male leads convert at 70.8% compared to 20.2% for female leads—a significant disparity requiring strategic intervention. Property inspections prove essential, boosting conversion rates from 19.5% to 61.3%. Residential properties dominate with 65.6% conversion, while commercial trails at 34.4%.

Sales Executive Performance Rankings

Performance Insights

Olumide leads the team with an exceptional 63.0% conversion rate—nearly double Chioma's 35.5%. The 27.5 percentage point gap between top and bottom performers indicates significant opportunity for skills transfer and training initiatives.

- 📌 Chukwudi's 48.6% rate places him solidly in second position, demonstrating consistent performance above the company average.

Critical Gender Disparity Analysis

Male leads demonstrate a 70.8% conversion rate (7 out of every 10 leads convert), while female leads convert at only 20.2% (2 out of every 10). Despite generating 104 female leads versus 89 male leads, the marketing team's efforts yield dramatically different results by gender segment.

The Inspection Imperative

Inspection Drives Success

Property inspections emerge as the single most critical factor in conversion success. Leads who attend inspections convert at 61.3%—more than triple the 19.5% rate for non-inspected leads.

Female Pattern: 64 females attended inspections, yielding 21 sales. The 43 who skipped inspections generated zero conversions.

Male Pattern: All 47 males who attended inspections converted to sales, demonstrating perfect correlation between inspection attendance and purchase decisions for this segment.

With Inspection

Strong conversion performance

Without Inspection

Minimal conversion success

Branch Performance: Lagos vs Rivers

Regional Overview

Lagos marginally outperforms Rivers with a 44.1% conversion rate compared to 42.9%. However, these aggregate numbers mask important gender-specific patterns that require distinct strategic approaches by location.

- Part 2 of this analysis provides detailed branch-level insights breaking down performance by gender and property type for each location.

Property Type Performance

Residential Properties

65.6%

Clear market preference for residential offerings drives nearly two-thirds of all conversions

Commercial Properties

34.4%

Commercial properties show moderate conversion but represent untapped potential

Industrial Properties

0.0%

Zero conversions indicate either lack of demand or insufficient marketing focus

Gender-Specific Performance Breakdown

Female Leads (104 Total)

- **21 conversions** from 64 who inspected properties
- **Rivers outperforms Lagos:** 24.5% vs 15.7% conversion
- **Residential preference:** 31.8% conversion for residential, 18.9% commercial
- **Only 32.8%** of female leads attended inspections—a critical gap
- **Top executives:** Chukwudi and Olumide at 27.3% each

Male Leads (89 Total)

- **63 conversions** with 100% inspection-to-sale rate
- **Lagos dominates:** 72.5% conversion vs 68.4% in Rivers
- **Strong residential preference:** 94.2% conversion, 58.3% commercial
- **Consistent performance** across most sales executives
- **Top performers:** Olumide (87.5%), Chukwudi (84.6%)

Strategic Recommendations

Prioritize Male Targeting

Shift marketing resources toward male demographics given their 70.8% conversion rate and superior ROI

Drive Female Inspections

Implement aggressive inspection scheduling for female leads —zero conversions without property visits

Emphasize Residential

Increase residential property marketing given 65.6% conversion versus 34.4% for commercial

Location-Gender Strategy

Focus male leads in Lagos, female leads in Rivers based on regional conversion patterns

Next Steps: Branch-Level Deep Dive

i This concludes Part 1 of our comprehensive analysis covering company-wide performance metrics.

Part 2 of this presentation will provide detailed branch-level insights, examining the specific patterns driving performance differences between Lagos and Rivers. We'll explore how gender, property type, inspection rates, and sales executive performance vary by location to inform targeted regional strategies.
